SHADESCAPES^{USA}
only nature compares

REFLECTING PERFECTION

In nature, structure and beauty are intrinsically tied. Veins and roots provide stability for breathtaking foliage. And the intricate petals of a flower are captivating in full bloom. Together, these organic components cultivate tranquility and inspiration.

Nature's sophisticated design is mirrored in every ShadeScapes shade umbrella through the synergy of durable construction and stunning aesthetics.

The sleek, marine-grade hardware and vibrant, fade-free fabric provide long-lasting strength and allure. Carefully engineered for optimum enjoyment, all the elements of a ShadeScapes shade umbrella integrate to form perfect outdoor compositions.

Explore ShadeScapes firsthand and see that only nature compares.

Shades in Bloom
Shademakers reflect nature
in all its forms.

The Lily Sidepost

The Lima Centerpost

The Isla Sidepost

SHADEMAKERS

The Shademakers line showcases a complete spectrum of sophisticated beauty engineered for flexibility and longevity. Designed by New Zealand yachting captain Russell Bond, the Shademakers brand features six innovative products and a myriad of styles for a total of 32 distinct shade solutions.

Engineered for Longevity

Shademakers are carefully crafted to withstand the elements and provide long-lasting coverage. Durable and saltwater-resistant anodized aluminum frames, combined with marine-grade components and stainless-steel hardware, ensure stability and pleasurable use year after year. A variety of mounting options allow for installation almost anywhere.

Complementary Configurations

Because of their architectural design qualities, Shademakers provide a sense of visual congruence within elegant environments. Select from sidepost, centerpost, and top-mount umbrellas to create a perfect shadescape in any setting. With the greatest range of flexibility, the sidepost umbrella rotates 360 degrees for continuous shade coverage as the angle of sunlight changes throughout the day.

Impressions in Fabric

The fabric on a Shademakers canopy always makes a lasting impression. Resistant to fading, mold, and mildew, the 100% solution-dyed acrylic canvas repels water, oil, and dirt to ensure enduring beauty. More than 100 solids and tweeds, in addition to striped patterns, help distinguish any patio, pool, or garden.

Perfect Visual Overtones

In addition to fabric color, an umbrella's finish and canopy shape can affect the overall appearance of an outdoor setting. The Shademakers line offers a silver finish that coordinates with cool tones and a custom bronze finish that harmonizes well with warm tones. Likewise, all umbrellas are available in square and octagonal canopy shapes, enabling customers to complement the predominant geometric patterns in their outdoor areas.

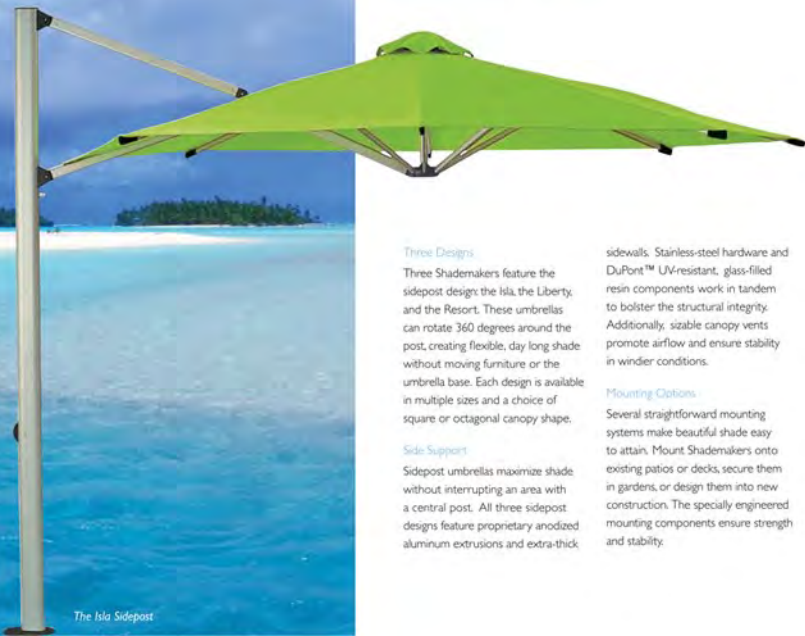

Canopy Customization

Some Shademakers feature additional customization options, including extra wind vents, valances, screen-printed logos, and drop sides. Several canopies can even zip together to form larger shaded areas.

Perfectly Shaped
Shademakers are available in square and octagonal canopy shapes.

SHADEMAKERS SIDEPOST

Three Designs

Three Shademakers feature the sidepost design: the Isla, the Liberty, and the Resort. These umbrellas can rotate 360 degrees around the post, creating flexible, day-long shade without moving furniture or the umbrella base. Each design is available in multiple sizes and a choice of square or octagonal canopy shape.

Side Support

Sidepost umbrellas maximize shade without interrupting an area with a central post. All three sidepost designs feature proprietary anodized aluminum extrusions and extra-thick

sidewalls. Stainless-steel hardware and DuPont™ UV-resistant, glass-filled resin components work in tandem to bolster the structural integrity. Additionally, sizable canopy vents promote airflow and ensure stability in windier conditions.

Mounting Options

Several straightforward mounting systems make beautiful shade easy to attain. Mount Shademakers onto existing patios or decks, secure them in gardens, or design them into new construction. The specially engineered mounting components ensure strength and stability.

SHADEMAKERS CENTERPOST

Two Designs

The Luna and Astral Shademakers feature a simple yet elegant centerpost umbrella design. Both are available in multiple sizes and a choice of a square or octagonal canopy shape.

Center Support

The classic symmetry of a centerpost umbrella provides timeless elegance and ambience for dining areas or chair pairings. Like the sidepost, the centerpost design features proprietary oval-shaped arms and specially engineered central hubs and components. Centerposts are crafted of yacht-grade anodized

aluminum, stainless-steel hardware, and DuPont™ UV-resistant, glass-filled resin components to bolster the structural integrity. While extra-large canopy vents allow for airflow and offer relief on hot days, they also ensure stability in windier weather.

Mounting Options

Using a variety of simple-to-install fittings, each of the centerpost Shademakers mounts easily onto patios, decks, or into garden areas. Many sizes can also attach to a portable base for the ultimate conveyable shade solution.

The Astral Centerpost

SHADEMAKERS

Beautiful and enduring, Shademakers are designed for low-maintenance use in both residential and commercial settings. All our Shademakers feature specially engineered materials and components for ensured strength and stability, including:

- Yacht-grade, UV-resistant, 20-mil-thick anodized aluminum mast, arms, and bridle
- Proprietary extrusions and friction-ridges
- Marine-grade stainless-steel hardware
- Glass-filled DuPont™ black-reinforced mylar-winder mechanisms and connectors
- Cold-processed and powder-coated spigot and base plate, guaranteed street-ground fitting

Shademakers can be easily installed in any environment. Mount onto existing concrete patios, wooden decks, or in garden areas — or design into new outdoor locations. Many styles can also attach to portable bases.

Sidepost Functionality

Additional structural features of the Isla, the Liberty, and the Resort:

- The ability to rotate 360 degrees around the mast
- Unique rotational locking mechanism for ensured safety
- External winding mechanism for effortless raising and lowering
- Vented canopy for greater stability

Please refer to the Shademakers CD and visit us at www.shademakers.com for more information.

THE ISLA

As the original Shademakers umbrella, the Isla offers elegant shade and a remarkable design. Rotate the Isla for 360 degrees of coverage, and tilt the canopy (see page 3) to reduce early- and late-day glare.

- One-piece design allows for easy transport, setup, and removal
- Stabilizer straps provide greater stability as winds increase
- Canopy folds into compact, vertical format when not in use

8' 10" square
9' 6" octagon
11' 2" octagon
12' 8" octagon

Sidepost | 65 lbs | Wind tolerance: light to moderate

THE LIBERTY

The Liberty is comparable to the Isla in size but sturdy enough for windier locations. Streamlined and innovative, its mast-and-boom design rotates 360 degrees to provide complete shade coverage.

- Three-piece design allows for easy setup and removal
- Canopy structure can be removed when not in use
- Winder mechanism enables simple raising and lowering

8' 2" square
9' 2" square
9' 10" octagon
11' 6" octagon
12' 11" octagon

Sidepost | 75 lbs | Wind tolerance: moderately strong

THE RESORT

Offering a stunning presence, the Resort is the largest and most robust of the sidepost umbrellas. Its 360-degree rotating mast-and-boom design resembles the Liberty but offers greater wind tolerance.

- Removable winder handle prevents tampering
- Stainless-steel safety pin ensures canopy pose
- Optional zipper links and drop sides create customizable shade

8' 2" square
10' 2" square
11' 2" square
12' 11" square
12' 11" octagon
14' 5" octagon

Sidepost | 250 lbs | Wind tolerance: moderately strong to strong

THE SIESTA

The ingenious Siesta is unique in its ability to attach to any specialty structure without a support pole. Create long-lasting shade retreats under pergolas, arbors, solariums, gazebos, lanais, and more.

- Simple cord-and-pulley hoist/clear system enables easy raising and lowering
- Lift-lock mounting bracket allows for fast removal

7' 10" square
8' 10" square
10' 2" square

Top-mount | 15 lbs | Wind tolerance: moderate

THE LUNA

With its breathtaking durability, the Luna puts a new twist on the traditional market-style umbrella. Its versatile installation options can create comfortable shade over tables, on the beach, or in any outdoor area.

- Marine-grade pulley/clear system enables easy raising and lowering
- Vented canopy for greater stability
- Freestanding base options and beach converter available

8' 10" square
9' 10" square
10' 2" square
11' 2" square

Centerpost | 25 lbs | Wind tolerance: light

THE ASTRAL

As the strongest of the Shademakers, the Astral is ideal for windier locations, yet its graceful design ensures an elegant look.

- Yacht-grade pulley/clear provides a straightforward system for raising and lowering
- Stainless-steel safety pin ensures canopy pose
- Optional zipper links and drop sides for customizable shade

7' 10" square | 8' 10" octagon
9' 2" square | 10' 2" octagon
10' 2" square | 11' 2" octagon
11' 2" square | 12' 11" octagon
12' 11" square | 14' 5" octagon
14' 5" square

Centerpost | 100 lbs | Wind tolerance: strong

FINISHES AND COLORS

Finishes

Choose between two anodized aluminum finishes — the standard silver and the custom bronze — to complement cool or warm architectural tones.

Canopy Fabrics

A variety of awning-grade fabrics and color choices ensure the perfect match for any setting. Select from our premium 100% solution-dyed acrylic canopies available in over 100 colors. Only the very best European and Sunbrella® fabrics are used, including:

- 10 standard European-milled colors
- 62 specialty European-milled colors and tweeds
- 30 Sunbrella specialty colors
- Striped fabrics and COM upon request

Standard colors

Sampling of specialty colors (refer to CD for full color range)

PARAFLEX WALL-MOUNT

Space-Saving Design

Any load-bearing wall or support beam of almost any material can hold a Paraflex wall-mount umbrella. Perfect for all locations and especially ideal for tight areas, these shade solutions become part of the architecture but offer more shade flexibility than a simple awning. The rotating arm and holder can remain against the wall or extend outward to provide shade. With the Paraflex wall-mount, achieve ample shade covering anywhere — especially perfect for sidewalk cafes, condo balconies, and small city gardens.

Long-Lasting Construction

The Paraflex wall-mount umbrella features all marine-grade materials. Guaranteeing longevity, the 20-micron extruded anodized aluminum frame resists saltwater and natural elements. The UV-resistant components and highest-grade stainless-steel hardware bolster the design's strength and durability. Like all ShadeScapes shade solutions, Paraflex umbrellas feature proprietary extrusions and specially engineered central hubs and connectors.

PARAFLEX POLE-MOUNT

Cover by Design

Paraflex pole-mount umbrellas offer a variety of shading configurations and colors to create distinct shadescapes. Use one or two canopies for a closer range of shade flexibility, or build an expansive covering with up to five canopies. Arrange a playful rainbow bouquet of vivid colors, or select one subtle canopy tone that blends into the surroundings for a consistent, sophisticated look.

Crafted for Endurance

The streamlined single/double pole, telescopic pole, and poletop act as the stems that stabilize the adjustable canopy blossoms of a Paraflex cluster. All three are crafted of rust-proof, saltwater-resistant anodized aluminum for long-lasting support. The additional specially engineered components feature UV-resistant materials for ensured durability.

Mounting Options

Pole-mount Paraflex umbrellas can be easily installed using one of 10 mounting options. Poles can be secured to concrete patios or wooden decks, installed onto in-ground fittings, or mounted on freestanding bases.

PARAFLEX

Versatile and inventive, the Paraflex brand offers a comprehensive solution for creating customized shade. Simply select a mounting style, type of pole, number of umbrellas, frame finish, and canopy color to fashion the picture-perfect shade bouquet. All umbrellas can tilt, rotate, and adjust in height to provide creative and continuous shade.

All Paraflex umbrella configurations utilize UV- and saltwater-resistant materials and components. The primary elements of the system are crafted of marine-grade, 20-mil aluminum anodized aluminum, including:

- Umbrella frame
- Rotating umbrella arm and holder (6' or 9')
- Single/double pole for one or two canopies
- Telescopic pole for up to four canopies
- Poletop adaptor fitting for a fifth canopy

Mounting Options

Select one of ten methods for easy installation:

- Concrete mount
- Wooden deck mount
- In-ground fitting
- Half-wall or railing bracket
- Ceiling mount
- Compression mount
- Freestanding flowerbox
- Freestanding 150-pound concrete-filled base with wheels
- Freestanding 250-pound concrete-filled base
- Base with four 100-pound pavers

Please refer to the Product Catalog for all the complete product specifications and more details.

WALL-MOUNT

Anchor the wall-mount Paraflex umbrella to almost any wall or support beam, then rotate and tilt the canopy to provide complete shade coverage at any time of day. The pole-free design is perfect in any location, but is especially convenient for small spaces.

- Umbrella frame with canopy
- One rotating arm and holder with wall support track

8' 10" hexagon x 1

Wall-mount • 18 lbs

SINGLE POLE-MOUNT

The pole-mount design offers all the flexible shade coverage of the wall-mount, but with a strong, streamlined pole structure that allows for installation almost anywhere.

- Umbrella frame with canopy
- One rotating arm and holder
- One single/double pole

8' 10" hexagon x 1

Pole-mount • 30 lbs

DOUBLE POLE-MOUNT

Double the amount of shade coverage by adding another umbrella to the same pole. The two completely adjustable umbrellas can easily shade a large dining table or a pair of lounges throughout the day.

- Two umbrella frames with canopies
- Two rotating arms and holders
- One single/double pole or one telescopic pole

8' 10" hexagon x 2

Pole-mount • 48 lbs

CLUSTER OF THREE

Use the telescopic pole to accommodate three umbrella canopies that can tilt and rotate independently to provide expansive shade coverage. Choose one fabric for all canopies, or mix and match colors to paint a vibrant scene.

- Three umbrella frames with canopies
- Three rotating arms and holders
- One telescopic pole

8' 10" hexagon x 3

Pole-mount • 66 lbs

CLUSTER OF FOUR

With the addition of a fourth umbrella and rotating arm and holder, a group of dining tables or series of chaises can fit comfortably in the shade.

- Four umbrella frames with canopies
- Four rotating arms and holders
- One telescopic pole

8' 10" hexagon x 4

Pole-mount • 82 lbs

CLUSTER OF FIVE

For the ultimate Paraflex shadescape, top off the cluster of four with a poletop that supports a fifth umbrella. The complete unit offers an expansive, adjustable circle of shade.

- Five umbrella frames with canopies
- Four rotating umbrella arms and holders
- One telescopic pole
- One poletop

8' 10" hexagon x 5

Pole-mount • 100 lbs

FINISHES AND COLORS

Finishes

Choose between two anodized aluminum finishes — silver and bronze — to complement either cool or warm architectural tones.

Silver finish

Bronze finish

Canopy Fabrics

A variety of umbrella-grade fabrics and color choices ensure the perfect match for any setting. Select from a beautiful range of water-repellent premium 100% solution-dyed olefin and acrylic canopies.

Texsilk® olefin

ONLY NATURE COMPARES

ShadeScapes shade umbrellas reflect nature's beauty through the combination of durable construction and stunning aesthetics. The canopies and mounting systems function together like flower petals and stems to create enduring, captivating forms.

Designed to complement the surrounding architecture and natural environment, ShadeScapes shade solutions enhance the long-lasting ambience of any residential, hospitality, or commercial space. The high-quality designs retain their beauty year after year.

As outdoor living and entertaining spaces continue to gain in popularity, designers, proprietors, and homeowners seek to make their exterior areas exceptionally comfortable, beautiful, and distinctive. ShadeScapes offers a variety of options to fulfill specific shading requirements. Select from a broad range of styles, finishes, and colors to create the perfect composition with a unique, alluring look.

When searching for the best shade umbrella, you'll find that nothing else compares to ShadeScapes shade solutions. Nothing compares, that is, except nature itself.

Natural Selection
Add zest to any setting
with ShadeScapes.

ORDER YOUR SOLUTION

Because we've chosen to bring you only the world's finest shade umbrellas, we are able to focus exclusively on the Shademakers and Paraflex lines. We know all the product features intimately and can help select the perfect solution for each distinctive setting. With unwavering attention to detail, we manage every order through delivery to ensure you are completely satisfied with your customized shadescape.

Select the perfect shade solution for your unique setting. Call us at 970.527.7070 or 866.997.4233, or visit us online at www.shadescapesusa.com or www.paraflex-umbrella.com.

The Resort Sidepost

Ron and Jo Edmondson founded ShadeScapes USA as a result of their quest to find the perfect shade solution for their Colorado home. For months they searched for an umbrella that offered both beauty and durability. They eventually discovered Shademakers, but the product line was unavailable in North America. Knowing that others would benefit from this remarkable brand, the Edmondsons decided to import the umbrellas themselves. ShadeScapes later expanded to include the Paraflex line, and the Edmondsons continue their mission to provide the world's most exceptional shade solutions.

5 STEPS TO PERFECT SHADE

- Design**
 Begin by selecting your ideal umbrella design.
Shademakers (Refer to pages 8-9 for details.)
 Sidepost: The Isla The Liberty The Resort
 Centerpost: The Astral The Luna
